

Summary :

Results-driven and detail-oriented .NET Developer with hands-on experience in designing, developing, and maintaining robust web applications using C#, .NET Core, and ASP.NET MVC. Proficient in building dynamic and responsive user interfaces with JavaScript, jQuery, HTML, CSS, and AJAX. Adept at implementing secure and scalable backend systems using Entity Framework and RESTful APIs. Experienced in integrating Keycloak for authentication and identity management, ensuring secure access control across applications.

Key Skills:

C# , .NET Core , .NET Web Api , ASP.NET MVC, ASP .NET Core, Entity Framework , SQL , MsSQL, PostgreSQL, HTML , CSS , JavaScript, JQuery, AJAX, ReactJS , C++ , Git , Source Tree , Jira , Microsoft Azure , KeyCloak authentication , Store Procedures , LINQ

Educational Information:

1. Computer Engineering (B.Tech) :	
Chandubhai S. Patel Institute of Technology. (CHARUSAT University). CGPA -7.45/10.00	09/2020 - 05/2024
2. 12th Grade (GSHSEB):	
Vasishtha Vidyalaya, Vav. (Surat) .76.61%	06/2019 - 03/2020

Work Experience:

1. Junior Software Developer , Dexoc Solutions (Ahmedabad)	06/2024-Present
- Enhanced ASP.NET backend services and optimized SQL queries, resulting in a 30% improvement in system performance and faster data retrieval times. - Contributed to the an aircraft parts management web application platform, managing aircraft part lifecycles by implementing key features for part birth, installation, removal, and exchange, enabling efficient traceability across systems. - Developed functionality for CSV-based bulk event tracking, streamlining data input processes and reducing manual effort by 40%. - Utilized AJAX to enable real-time user interactions, improving responsiveness and overall user engagement. - Integrated Keycloak for secure, role-based authentication, significantly enhancing access control and protecting sensitive data.	
2. Software Engineer Intern , Civica Resource Pvt. Ltd. (Vadodara)	02/2024-04/2024
- Proficient in ASP.NET MVC architecture, with hands-on experience in developing scalable and maintainable web applications aligned with industry best practices. - Experienced in ADO.NET, with a focus on efficient data manipulation, transaction handling, and seamless database communication to support high-performance application layers. - Skilled in SQL Server 2022 and SQL Server Management Studio (SSMS), with a proven ability to design, implement, and optimize complex database structures, improving query performance and ensuring data integrity. - Proficient in developing RESTful APIs, enabling smooth and secure data exchange between front-end interfaces and back-end systems, contributing to modular and service-oriented application design.	

Projects:

1. Aircraft Parts Management Web Application
- Contributed to the development of an aircraft parts management web application designed to support multiple airlines by enabling detailed event tracking through CSV file uploads. - Designed and enhanced core features for event management, including part birth, installation, removal, and exchange, ensuring accurate tracking and automated generation of component history. - Implemented AJAX to enable real-time data interactions, improving responsiveness and enhancing the overall user experience. - Integrated Keycloak to implement role-based authentication and authorization, significantly enhancing application security and access control. - Acquired in-depth experience in .NET backend development, focusing on performance optimization, secure data handling, and efficient API integrations.
2. Exam Question Paper Generator
- Led the development of a scalable e-commerce platform focused on automating question and assignment generation, with features for real-time solution delivery and dynamic blueprint creation. - Designed and implemented customizable templates and a modular architecture, enabling efficient content generation and consistent formatting across educational materials. - Engineered a high-performance backend capable of handling large volumes of concurrent transactions, ensuring fast response times and reliable user experiences.
